|-------------|---|-------------------------------------|
| • MySQL | • Salesforce Certified Platform Developer-I | • AWS Cloud Practitioner Essentials |
| • Core Java | | |

INTERNSHIP

Walmart USA Advanced Software Engineering Virtual Experience Program on Forage 03/2024
USA

- * Completed the Advanced Software Engineering Job Simulation where I solved difficult technical projects for a variety of teams at Walmart.
- * Developed a novel version of a heap data structure in Java for Walmart's shipping department, showcasing strong problem-solving and algorithmic skills.
- * Designed a UML class diagram for a data processor, considering different operating modes and database connections.
- * Created an entity relationship diagram to design a new database accounting for all requirements provided by Walmart's pet department.

Salesforce platform Developer-I, -Saasguru Training 02/2022 – 04/2022
Bengaluru, India

- Salesforce Platform Developer-I Certified Professional adept in data modeling, integration, debugging and security implementation.
- Proficient in Apex programming language for implementing business logic, triggers, and batch processes to automate complex business processes.
- Skilled in designing and developing custom user interfaces using Visualforce pages and Lightning components to create intuitive and responsive user experiences.
- Possess over 14,000+ Salesforce Trailhead points.

Zuari Technologies pvt ltd - Core Java Developer Internship 02/2021
Chennai, India

PROJECTS

Safe Locker with FINGERPRINT ID & RF ID, *Using Internet of Things*

IoT-based locker system employs fingerprint and RF ID authentication for heightened security. Through an intuitive interface, users register their biometric information and link RF ID tags or cards to them. It is adaptable and scalable, providing strong security for both private and business use.

Java Webapp Creation, *Based on Web Developement*

Developed Java web applications utilizing JSP and Servlets. I implemented the Model-View-Controller(MVC) architecture which included user authentication, data validation, and database integration for storage. This internship honed my skills in backend development, JDBC, and creating dynamic web interfaces.
